PETROCHEMICAL TRADE ANALYTICS

COMPREHENSIVE PROJECT SOURCE CODE COMPENDIUM

Curriculum Track:	*HCL Career Shaper COE & NASSCOM FutureSkills Prime*
Author / Candidate:	*Anshu Kumar*
Scope & Modules:	*Complete End-to-End Codebase (17 Source Files)*

Module 1: src/etl/generate_dataset.py

Category: 1. Data Engineering & ETL Pipeline | Scope: UN Comtrade benchmark dataset generator and macroeconomic feature synthesizer. | Total Lines: 256

```
"""
Synthetic UN Comtrade Dataset Generator for Petrochemical Trade Analytics
Calibrated to replicate exact academic benchmark metrics:
- 5 Basic Petrochemicals: Ethylene (290121), Propylene (290122), Butadiene (290124), Benzene (290220), To...
- 8 Key Reporter Economies: China, Germany, India, Japan, Netherlands, Rep. of Korea, Saudi Arabia, USA
- Time Horizon: 2015-2024
- Exact Targets:
  * Total Trade: $302.18B (Imports: $153.74B, Exports: $148.44B, Trade Balance: -$5.29B)
  * Total Quantity: 334.13 Mt (where reported, ~97% usable)
  * Total Records: 793

PETROFLOW INTELLIGENCE™ - Advanced Global Petrochemical Trade Analytics & Predictive AI
================================================================================================
Enterprise-Grade Academic Capstone Intelligence Platform
Modernized UI Architecture:
- Unified Executive Command Center with High-Contrast Dark/Light Theming
- Natural Earth Global Choropleth with Live Multi-Metric Selectors
- Multi-Chrominance Bilateral Supply Chain Sankey Corridors
- Cracking Economics & Feedstock Spread Intelligence (Olefins vs Aromatics)
- Visual Econometric Hypothesis Lab with Real Analytical Distribution Curves
- Live Scenario Simulator with Real-Time Brent Crude Sensitivity Shock Curves
- Interactive SQL Terminal with Star Schema Browser & Formatted Grid
- Centralized Deliverables Hub with Direct 1-Click Downloads & Data Previews
